Dear Gary:

Babies are the most wonderful, beautiful things in the world. Yours is no exception. However, he also has those piercing eyes that certainly some day will be those of a real searcher for truth.

I will be delighted to write an introduction for your book.

I do not have a copy of the 11-23-63 NYTimes' Similas article.

God knows the status of the Shaw trial. Jim's setting a date served to force what has happened: open federal delay.

I spent very little time in the office when I was there. Instead, I continued my own investigations which I reported to him. They were, I think, quite fruitful.

Excuse the haste. I just returned and am more than ever behind a stack of overdue work.

Sincerely,

Harold Weisberg
